Dear Martin Diessner,

With this email, we would like to update you on the progress of the Constantia Fibre initiative.

To give you a quick update on where we are:

- More than 1,600 Constantia residents have registered on constantiafibre.com
- From the 11 fibre infrastructure providers responding to our RFP, the joint venture between Link Africa & Frogfoot Networks were selected as the preferred partner to install an open access optic fibre network, which covers the whole of the Constantia area and even beyond
- We have currently engaged with 6 Internet Service Providers that will offer fibre based services to residents at attractive prices.
- All packages and prices are available on our website, and we are starting the sign-up process for residents **today!**

The good news is that Link Africa & Frogfoot Networks anticipate the first house to be connected as early as 29th of June (this year!) and their goal is to have a fibre connection running past everyone's gate by Christmas 2015.

So what's next?

Very simple. We prepared a [unique link for you to click on](#), which will take you to the Constantia Fibre website where you can select one or more fibre packages from the various providers. There is a video on the page as well that explains how to enquiry about fibre packages.

Once you added one or more packages to your enquiry, look out for the white shopping basket in the top right hand corner of the page, click that, confirm your address details and voila, that's it! A sales representative from the ISP will contact you in due course in order to explain the package you have shown interest in, answer any question you might have and once you have decided on an ISP and package, to help you with the actual contract.

The following [link](#) is personalised and pre-configured with your personal data, so that you do not need to re-type the address information that you have used when you signed up on the website before:
